

CURRICULUM VITAE

Matthew F. Chojnacki

Associate Staff Scientist

Lunar and Planetary Laboratory, University of Arizona
Sonett Space Sciences Annex, 1541 E. University Blvd., PO Box 210063
Tucson, AZ 85721-0063
Tel: (520) 626-0752, Fax: (520) 626-8998
chojan1@pirl.lpl.arizona.edu
<http://www.lpl.arizona.edu/~chojan1>

EDUCATION:

Ph.D. in **Planetary Geology and Remote Sensing**, *University of Tennessee*, Knoxville, TN. *Dissertation: [Martian Dune Fields: Aeolian Activity, Morphology, Sediment Pathways, and Provenance](#)* (2013)

Advisers: Devon Burr and Jeffrey Moersch

B.A. in **Physics**, *University of Colorado*, Boulder, CO. (2004)

B.A. in **Planetary Science** (*Magna Cum Laude*), *University of Colorado*, Boulder, CO. *Thesis: Surficial Properties of Ophir Chasma, Mars: Integration of Remote-Sensing Data* (2004)

Advisers: Bruce Jakosky and Brian Hynek

PROFILE:

Dr. Matthew Chojnacki is a Lunar and Planetary Laboratory Associate Staff Scientist working with the [High Resolution Imaging Science Experiment](#) (HiRISE) mission at the University of Arizona. He is a planetary geologist who has been involved with the scientific exploration of Mars for over a decade. His recent research has focused on the geologic, morphologic, and climatic evolutions of Mars, particularly: aeolian transport and sand dune dynamics, the thermophysical and spectral properties of the martian surface, aqueous alteration and weathering of planetary crusts, and terrestrial analog studies. He has participated and led several focused studies and grants, which involve geologic mapping and constraining contemporary dynamic surface processes (Recurring Slope Linea (RSL), active sand dunes). At the HiRISE Operations Center (HiROC) Matt co-manages the photogrammetry lab, participates in HiRISE-related targeting and Uplink, and initial science assessments of data products. Most recently he has joined the Origins, Spectral Interpretation, Resource Identification, Security, Regolith Explorer ([OSIRIS-REx](#)) mission team by leading stereo photogrammetry Digital Terrain Model (DTM) preparation and production.

RESEARCH INTERESTS:

- Surface composition, thermal properties, and geology of planetary crusts
- Thermophysical and spectral properties of the Martian surface
- Surface morphology gained from DTM-derived topography

- Remote and laboratory reflectance and emission spectroscopy
- Aqueous alteration and weathering of planetary crusts
- Active surficial processes and their role in landscape evolution
- Aeolian transport and induration processes, dune dynamics and morphology
- Terrestrial analog studies and comparative planetology

GRANTS/AWARDS/HONORS:

- 2019 NASA Mars Data Analysis Program (*Pending*), Characterizing the Dynamic Activity of Martian Mega-ripples and Transverse Aeolian Ridges (PI Chojnacki) – PI (2020-2023)
- 2019 NASA Solar System Workings (*Under Review*), Sediment Transport Analogs using River Valley Eolian Dunefields (STARVED) (PI Joel B. Sankey) – Co-I (2019-2021)
- 2016 NASA Mars Data Analysis Program, The Distribution, Properties, and Implications of Ancient Paleo-Bedforms on Mars – PI (2017-2021)
- 2016 NASA Mars Data Analysis Program, Martian Dust Devil Tracks in HiRISE and CRISM (PI Ingrid Daubar) – Co-I (2017-2020)
- 2016 NASA Mars Data Analysis Program, Characterization of Layered Deposits at the Valles Marineris Plateau (PI Isaac Smith) – Co-I (2017-2020)
- 2015 NASA Mars Data Analysis Program, Studies of Dune Dynamics and Temporal Flux Variations on Mars (PI Nathan Bridges) – Co-I (2016-2019) – Completed 2019.
- 2014 NASA Mars Data Analysis Program, Characterizing Global Sand Flux for Martian Bedform Construction Times and Erosion Rates – PI (2015-2019)
- 2013 NASA Planetary Geology and Geophysics Program, Geologic Map of the Coprates Chasma, Valles Marineris, Mars (PI Brian Hynek) – Co-I (2015-2017) – Completed 2018.
- 2012 NASA Mars Data Analysis Program, Characterizing the Current Aeolian Transport Environment for Sediment in Greater Meridiani Planum (PI Tim Michaels) – Co-I (2014-2016) – Completed 2016.
- 2017 NASA Group Achievement Award – MER Operations and Science
- 2013 NASA Group Achievement Award – OSIRIS-REx
- Honorable Mention for Planetary Geology Division of the Geological Society of America Stephen E. Dwornik Planetary Geoscience Student Paper Award (Graduate Oral) at the 2013 Lunar and Planetary Science Conference.
- Tennessee Space Grant Fellowship 2008-2012
- Winner of the 2010 and 2012 Mars Exploration Program Mars Student Travel Award
- Winner of the 2011 [Mayo Foundation Educational Scholarship](#)
- Winner of the [2010 Third Lunar Planetary Institute Career Development Award](#)
- Winner of the 2006 AGU Editor's Choice award for "[Surface Processes](#)"

PROFESSIONAL EXPERIENCE:

- [HiRISE](#) Operations Center (HiROC), [Lunar and Planetary Laboratory](#), University of Arizona (Associate Staff Scientist), 7/2015 – present
 - HiROC Photogrammetry Lab Co-manager and DTM Validator

- [Aeolian](#) – Science Theme Lead (STL) 8/2017 – present
 - [Composition & Photometry](#) – Science Theme Lead (STL), 3/2014 – 8/2017
- University of Arizona ([HiRISE](#) Postdoctoral Research Associate), advised by Alfred McEwen, 1/2013 – 6/2015
- OSIRIS-REx [OSIRIS-REx CAMera Suite](#) (OCAMS) team (stereo photogrammetry DTM production lead), 1/2015 – present
- [Department of Earth and Planetary Sciences](#), University of Tennessee (Graduate Teaching and Research Assistant), 8/2007 – 5/2013
- [Laboratory for Atmospheric and Space Physics](#), University of Colorado (Professional Research Assistant), 5/2004 – 6/2007
- NASA's 24th Annual [Planetary Science Summer School](#), 2012
- Lunar and Planetary Institute: [Field Training and Research Program at Meteor Crater](#), 2010
- USGS/NASA [Planetary Photogrammetry Guest Facility](#) (participant), 2009-2012
- NASA Volcanology Field Workshop (Hawaii), 2005
- U.S. Olympic Team, 1998; U.S. Ski Team, 1995-2001
- U.S. World Championship Team, 1995, 1997 & 1999
- Argentinean Olympic Ski Team Coach, 2002
- [Flying Ace Production](#) at the [Utah Olympic Park](#), Performer, 1998–2014

PROFESSIONAL ORGANIZATIONS:

- American Astronomical Society / Division for Planetary Sciences, 2012 – present
 - Federal Relations Subcommittee, 2012 – present
- American Geophysical Union, 2006 – present
- Planetary Society, 1997 – present

SCIENTIFIC COLLABORATORS IN THE PAST 2 YEARS:

Maria Banks (NASA Goddard), Ingrid Daubar (JPL), Dani DellaGiustina (Uni. of Arizona), (Serina Diniega (JPL), Colin Dundas (U.S.G.S.), Lori Fenton (SETI Institute), Brian Hynek (University of Colorado, Boulder), Alfred McEwen (Uni. of Arizona), Luju Ojha (APL), Isaac Smith (York University/PSI), Livio Tornabene (Uni. of W. Ontario), James Wray (Georgia Institute of Technology).

TECHNICAL SKILLS:

- Computer experience includes: extensive experience with ENVI/IDL, ESRI ArcMap, stereo processing with SOCET SET (®BAE Systems) photogrammetry software, Integrated Software for Imagers and Spectrometers (ISIS), JMARS, Google Earth, ISIS, Adobe Photoshop/Illustrator, Word, Excel, with both Macintosh and PC. Programming writing experience with IDL, Perl, and ISIS.
- Remote geologic mapping using multiple data sets (visible-wavelength images, composition, thermophysical, topography), thermophysical modeling (TES and THEMIS), and standard data processing (Mars: MOC, MOLA, TES, THEMIS, PanCam, HRSC, HiRISE, CTX, and CRISM; Earth: AVIRIS, MASTER, SRTM).

- Geology field work: Experience with stratigraphic, geologic, and morphologic field mapping, Differential Global Positioning System (DGPS) mapping, and high-resolution LIDAR (light detection and ranging) survey equipment.

SERVICE:

- Aeolian Research *Special Issue for the Fourth International Planetary Dunes Workshop* (Lead Guest Editor): 2015 – 2016
- Journal of Geophysical Research – Planets special Issue for the *Investigations of the Bagnold Dune Field, Gale Crater* (Associate Editor): 2016 – 2017
- NASA R&A Panel (Subpanel member; Chief*): 2015*, 2016*, 2017, 2018*, 2019*
- NASA Mission Instrument Panel (Subpanel member): 2015
- Peer Review Service (Icarus, JGR-Planets, Aeolian Research, Science): 2009 - present
- American Astronomical Society / Division for Planetary Sciences, 2012 – 2014
 - Federal Relations Subcommittee, 2012 – 2014

TEACHING COMPETENCIES:

- Photogrammetry Lab Co-manager and DTM Validator GTA for several different introductory Earth and planetary geology courses (2007–2012)
- Spring and Fall 2010: GTA for *Process Geomorphology* (designed and led lab exercises for Undergraduate/Graduate students)
- Fall 2010 and Fall 2011: guest lecturer at Univ. Tennessee for GEO 380 *Geomorphology*
- Spring 2011: guest lecturer at Univ. Tennessee for GEO 102 (Earth, Life, and Time)
- Spring 2012: guest lecturer at Univ. Tennessee for GEO 104 (Exploring the planets)
- Fall 2007 – 2012: volunteer at McClung Museum teaching basic concepts of geology to local primary/high schools

PEER-REVIEWED PUBLICATIONS:
